Profile

Software Engineer and Machine Learning Engineer with 2 years of experience designing, building, and deploying production-grade NLP, Retrieval-Augmented Generation (RAG), and LLM-based systems. Skilled in API and service engineering with Python and FastAPI, with hands-on experience in tool/function calling patterns, prompt engineering, and vector retrieval within agentic AI workflows. Proven track record of optimizing deep learning model inference latency by 60

Experience

Meera Group of Companies — Remote
Machine Learning Engineer

Jan 2024 – Dec 2025

- Designed and deployed machine learning models and NLP pipelines for group entities including Miralux Impex (India) and Meera International (Hong Kong).
- Built and optimized RAG-based intelligent systems, reducing model inference latency by 60% through vector retrieval and chunking strategies.
- Collaborated with cross-functional international teams across Africa and Asia to translate business requirements into scalable ML solutions.

Projects

KnowYourPdf | Python, FastAPI, LangChain, Llama-3, FAISS, Docker
2025

- Architected a production-ready RAG pipeline using LangChain and FastAPI, reducing Llama-3 inference latency by 60% through optimized vector retrieval and prompt engineering.
- Implemented FAISS vector store with Maximal Marginal Relevance (MMR) search, enabling 30 concurrent document queries with 60% improvement in context precision.
- Engineered a fully containerised CI/CD deployment pipeline using Docker, cutting environment setup time from 2 hours to 35 minutes.

Healthcare Disease Prediction System | Python, DistilBERT, PyTorch, Hugging Face, Docker
2025

- Fine-tuned DistilBERT for multi-class text classification on a merged clinical dataset from 5 sources, achieving an F1-score of 0.90.
- Built a scalable NLP preprocessing pipeline with parallelised tokenisation, reducing data processing time by 20%.
- Deployed the model using Docker for reproducible inference across development and production environments.

Education

JECRC University — Jaipur, Rajasthan
Master of Computer Applications (Equiv. Master of Science in Computer Science / Data Science) (CGPA: 7.5/10)
2024 – Present

Lachoo Memorial College — Jodhpur, Rajasthan
Bachelor of Computer Applications (CGPA: 8.1/10)
2021 – 2024

Relevant Coursework: Machine Learning, Natural Language Processing, Data Structures & Algorithms, Database Systems

Technical Skills

Languages:	Python, SQL, C++, Java
ML / AI Frameworks:	Hugging Face Transformers, Scikit-learn, PyTorch, LangChain, FAISS
NLP & LLMs:	RAG, Fine-tuning, DistilBERT, Llama-3, Prompt Engineering, Text Classification
MLOps & Deployment:	Docker, CI/CD, FastAPI, Git/GitHub, REST APIs
Data & Other Tools:	Pandas, NumPy, Streamlit, MongoDB, MS Excel, Salesforce

Certifications & Achievements

- IBM via Coursera:** Build RAG Applications: Get Started
Mar 2026
- IBM via Coursera:** Tools for Data Science
Apr 2026
- IBM via Coursera:** Vector Databases for RAG
Apr 2026
- IBM via Coursera:** Develop Generative AI Applications
Feb 2026
- Smart India Hackathon 2025** (Internal Finals): Ranked 4th out of 200 teams; prototyped and deployed a working solution within 12 hours, resolving critical deployment failures under time pressure.
